Rachit Kale

Mumbai, Maharashtra | +91 91485 35258 | rachitkale05@gmail.com | linkedin.com/in/rachit-kale | github.com/Rachit-Kale

Professional Summary

Full-stack developer experienced with backend-driven MERN applications and intelligent decision support systems. Built AI-powered interview preparation and metro fleet scheduling platforms, qualifying for Round 2 of Smart India Hackathon 2025. Currently developing a multimodal AI interview system and a hybrid anomaly detection model for UPI transactions, with a strong foundation in Java-based Data Structures & Algorithms and scalable backend architecture.

Technical Skills

Languages: JavaScript, SQL, HTML5, CSS3
Backend & Database: Node.js, PostgreSQL, MongoDB
Frontend: React.js, HTML, CSS, Tailwind CSS
Tools: Git, GitHub
Core Concepts: Data Structures & Algorithms (Java), OOP

Experience

Software Development Intern — KJSSE *Jan 2026 – Apr 2026*
Mumbai, India
MERN, Gemini API, GitHub, Vercel, Web Speech API, Monaco Editor, JWT auth

- Developed a full-stack multimodal AI interview preparation platform using the MERN stack to help students prepare for technical and behavioral interviews.
- Implemented the Gemini API for dynamic interview question generation based on user roles, skills, and uploaded resumes.
- Built interactive voice based, video based and coding interview modules with real time interview simulation features.
- Designed and implemented RESTful APIs for interview session management, response storage, automated feedback generation, and readiness score evaluation.
- Integrated speech-to-text processing and collaborated on system architecture, testing and documentation to ensure scalable and efficient deployment.

Projects

AI-Driven Train Induction Planning & Scheduling System *Sep 2025 – Nov 2025*
React.js, Node.js, PostgreSQL, AI Simulation, Data Visualization, DeepSeek API

- Designed and developed a interactive dashboard-based decision-support system for automated train induction planning for KMRL.
- Developed an AI-based simulation module to generate optimised train induction schedules using rule-based constraints and multi-objective logic.
- Implemented explainable output generation with conflict alerts and "what-if" simulation capabilities.
- Collaborated in a cross-functional team environment to translate complex operational requirements into a scalable digital solution.

AI-Powered Interview Preparation Platform *Aug 2025 – Dec 2025*
MongoDB, Express.js, React.js, Node.js, REST APIs, Authentication, Gemini API

- Developed a full-stack AI-driven interview preparation platform enabling users to practice role-specific interview questions with in-depth conceptual explanations.
- Implemented secure authentication and authorization to manage user profiles, preferences, and personalized learning paths.
- Built RESTful APIs for question retrieval, response evaluation, and user progress tracking.
- Developed responsive React-based UI for interactive interview simulation and structured topic exploration.

Education

K. J. Somaiya School of Engineering (KJSSE), Mumbai *2023 – 2027*
CGPA: 8.3 / 10.0
Final Year Project: Hybrid Anomaly Detection for Identifying Ambiguous UPI Transactions.

Certifications & Achievements

- Qualified for Round 2 — Smart India Hackathon 2025 (National Level); Developed AI-Driven Train Induction Planning & Scheduling system for Kochi Metro Rail Limited
- UX Design Fundamentals – California Institute of the Arts (Coursera) (Oct 2025)
- Web Design: Strategy and Information Architecture – California Institute of the Arts (Coursera) (Oct 2025)
